POWER SUPPLY ADAPTER FITTING

POWER SUPPLY ADAPTER FITTING

The power supply adapters are a tight fit. This tip will make it easier to fit the adapter properly.

1. Insert the adapter so it's positioned to engage with the small internal tab (opposite the release tab) first.
2. Tilt the power supply and press the prong nearest the small internal tab onto a hard surface. Use downwards force to engage the adapter with the small tab first. The release tab will engage after that and the adapter should now be a snug fit into the recess.

Apply force on the small internal tab by tilting the power supply when pressing down
